

Test Case : US DB - Recipe 83 | DBCS-94 Template Start-new | All

- **Platform:** Run on desktop and mobile
- **Page Targeting**
 - The test should only run on the provided landing page.- <https://start-new.debtbusters.co.za/landing-pages/omni-lp>
- **Design Accuracy**
 - Build should reflect the design applied. The main content container is set to 1024px. This will accommodate smaller screen sizes. As the screen gets larger, the main content container should remain 1024px, and the margin should increase to the left and the right
 - **Font-** The default page font family from the website should be used
 - **Text** - The text on all pages should reflect the design
- **Form Validation**
 - If the first name, last name, phone number and ID number is blank, then a validation message should be displayed around the input
 - The phone number can't be longer or shorter than 10 digits, a validation should display
 - The email should be in a valid form – it should contain @ sign
 - In the case of incorrect email, a validation message should display
 - The ID number needs to have 12 digits, if the ID number is shorter than 13 digits, a validation message should be displayed
 - Only once all the requirements are met should the user be allowed to proceed.
