

## Test Case : Recipe 111.113 | Plans and pricing Health short-LP | All

- **Platform:** Run on desktop and mobile
- **Page Targeting:**
  - The test should only run on the provided landing page.
    - /Landings/health-insurance-
  - URL parameters need to be passed through on button clicks to the online quote page
  - The test should not be run on unintended pages with similar URLs
    - <https://landings.oneplan.co.>
    - <https://landings.oneplan.co.>
    - <https://landings.oneplan.co.>
- **Design Accuracy :**
  - Include Plan Pricing Info Cards in the existing USP's section
  - Font size and weight should match the design
  - The cards should stack on the mobile
- **Plan Brochure Button:** Verification of the "Download plan brochure" button: When the button is clicked, the plan brochure for the plan associated with the card should open in a new tab.
- **Plan Cards Bullet Points:** The bullet point of each card should be match with the **ux/ui**
- **Validation of the "Call me" form:**
  - If the first name is blank, then a red stroke should be displayed around the input
  - If the last name is blank, then a red stroke should be displayed around the input
  - If the phone number is blank,
    - then a red stroke should be displayed around the input
    - Text should be displayed under the input informing the user the phone number is not valid
    - Only 10 numbers should be allowed to be entered into the phone number input
    - Spaces should be automatically removed from the input
  - If the email is blank, a red stroke should be displayed around the input
  - When the form is submitted, the user should be taken to the thank you page
  - The form validation should apply at the top of the page and the bottom of the page

- If “get an online quote” is clicked, the user should be taken to the online quote page and the generated URL parameters should be passed through to the quote page
- Reviews should have an automatic scroll
