

Bug Report

One Plan

I have discovered four new bugs from the provided webpage link

Bug ID	1
Test Case	Validation of the pet quantity selector
Expected Output	The pet quantity selectors should be displayed next to each other
Actual Output	The pet quantity selectors continued to function as expected but in the case of maximum pet the pop up message wouldn't displayed
Severity	Low
Priority	Low
Status	New

Bug ID	2
Test Case	Validation of the pet and owner information form with blank input
Expected Output	A pop up message "required" should be displayed
Actual Output	No pop up message shown
Severity	Low
Priority	Low
Status	New

Bug ID	3
Test Case	Validation of the input field on the second part of the form
Expected Output	The above-mentioned inputs should no longer display
Actual Output	The above-mentioned inputs has displayed
Severity	Low
Priority	
Status	New

Bug ID	4
Test Case	Validation of the previous button
Expected Output	The users return to the new inputs, the test function as expected
Actual Output	The previous-mentioned inputs has displayed
Severity	Low
Priority	
Status	New

I have designed the following test cases from the UI/UX page. I have found no bug here. All the test case have passed as per requirements.

Test Case ID	1
Test Case	Validation of the pet quantity selector
Expected Output	The pet quantity selectors should be displayed next to each other
Actual Output	As expected
Status	Passed

Test Case ID	2
Test Case	Verification of the adjustment of auto-filled input where the final pet count displays
Expected Output	The pet quantity count displayed field should display accurate number of the total pet
Actual Output	As expected
Status	Passed

Test Case ID	3
Test Case	Verification of the heading above the input field
Expected Output	The Heading: "Tails are wagging. We have 5 questions for you, the pet parent" should displayed
Actual Output	As expected
Status	Passed

Test Case ID	4
Test Case	Verification of the input field below the heading "Tails are wagging. We have 5 questions for you, the pet parent"
Expected Output	The input field should be displayed on the first part of the page
Actual Output	As expected
Status	Passed

Test Case ID	5
Test Case	Verification of the "Now we need to know a

Expected Output	little more about your pet(s)" content. The heading "Now we need to know a little more about your pet(s)" should be displayed
Actual Output	As expected
Status	Passed

Test Case ID	6
Test Case	Validation of the sign up form with valid input data
Expected Output	The user should be able to continue to the next step
Actual Output	As expected
Status	Passed
