

Test Case : UC1 | Mobile form ATF | Mobile - DCZ-153 !

- **Platform** : The test should run on both desktop and mobile
- **Design Accuracy**
 - The page title should be displayed above the form
 - This text should be centered
 - The text size should be adjusted
 - The numbered list needs to be displayed below the form
- **Targeting** - This test needs to run on <https://debt.co.za/free-calculator/> and <https://start.debt.co.za/free-calculator/omni-debt-lp>
- **Font** - The form heading font size needs to be adjusted
- **Form Validation**
 - If the first name, last name, phone number and ID number is blank, then a validation message should be displayed around the input
 - The phone number can't be longer or shorter than 10 digits, a validation should display
 - The email should be in a valid form – it should contain @ sign
 - In the case of incorrect email, a validation message should display
 - The ID number needs to have 12 digits, if the ID number is shorter than 13 digits, a validation message should be displayed
 - Only once all the requirements are met should the user be allowed to proceed.
