Test Case : Recipe 1 | DBCS-94 applied to CreditSav | All v2

- **Platform –** The build should run on both desktop and mobile
- **Design Accuracy**
  - The build should reflect the supplied design – the current container will need to be made wider
  - The default font family from the website should be used
  - The current website nav bar and footer should display
  - New design needs to apply to the review section as well
- **Form Functionality**
  - Registration link and contact links should work as expected
  - User needs to input ID number in order for the form to display
  - A call to action button named "**Continue**" should display before the ID number is submitted
- **Form Validation**
  - Once the ID number is validated, the form should display, and the call to action text should be updated to "**Sign up**"
  - When the form is submitted, the OTP pop-up should display
