Test Case for Recipe 47 | DBCS-94 new template on FF | All v2 | JM-203

- **Design Accuracy**
  - Build should reflect the design applied
- **Text and Fonts:**
  - This includes text sizes and colors, default font family
- **Responsiveness:**
  - The main container must be set to 1024 px : Verify when the screen gets larger, the main container should remain 1024 px and the margin should increase to the left and the right
  - Verify whether the logo and navigation can expand with container or remain within the 1024 px container
  - Verification the link and button workflow
- **Form**
  - Updated text
  - Input field : ID number
  - Button text should "Check now"
  - Validation of the ID number
    - **Valid ID Number :** In the case of valid ID number the form should loading for 2 seconds
    - **Invalid ID Number:** In the case of invalid ID number the input field should turn red on the first button click
